Patent Term Extended Under 35 U.S.C. § 156

An interim extension of the term of U.S. Patent No. Re. 34,617 has been granted under 35 U.S.C. § 156(e)((2) for a period of one year from the extended expiration date of the patent. The patent has twice been extended for one year under 35 U.S.C. § 156(d)(5). See 1159 OG 77, February 22, 1994, and 1171 OG 32, February 14, 1995. An application for patent term extension was filed, on January 24, 1996, by The Procter and Gamble Company, based on approval of the food additive product "olestra" by the Food and Drug Administration (FDA) on January 24, 1996. The initial PTO review of the application to date indicates that the patent would now be eligible for a maximum extension of the patent term for a period of two years from the date of approval by the FDA (January 24, 1996) under 35 U.S.C. §§ 156(g)(6)(C) and (d)(5)(E)(ii).

Announcement on the Starting Date of Operations under the Eurasian Patent Convention

The United States Patent and Trademark Office received notification from the World Intellectual Property Organization (WIPO) that:

1. The starting date of operation under the Eurasian Patent Convention* which was done at Moscow on September 9, 1994, is January 1, 1996. As from that date, the Eurasian Patent Office receives Eurasian patent applications and Eurasian patents can be sought** in international applications under the Patent Cooperation Treaty (PCT).

Name of the Office:	Evraziiskoe patentnoe vedomstvo (EAPV) Eurasian Patent Office (EAPO)
Location and mailing address:	M. Cherkassky per. 2/6, EAPV Moscow Centre, GSP, 103621 Russian Federation
Telephone:	(70-95) 206 63 21
Facsimile:	(70-95) 921 24 23

The President of the Eurasian Patent Office is Mr. Viktor I. Blinnikov.

2. By December 31, 1995, the following nine States (hereafter referred to as "the Contracting States") have deposited their instruments of accession to, or ratification of, the Eurasian Patent Convention with the Director General of the World Intellectual Property Organization: Armenia, Azerbaijan, Belarus, Kazakstan, Kyrgyzstan, Republic of Moldova, Russian Federation, Tajikistan and Turkmenistan.***

3. The Convention allows anyone—irrespective of nationality or domicile—to obtain a Eurasian patent for invention, having effect in all the Contracting States, by filing a single application with, and making a single payment to, the Eurasian Patent Office in Moscow. The request part of an application for the grant of a Eurasian patent must be in Russian. Other parts of the Eurasian application may, at the moment of the filing of the application, be in Russian or in any other language. For any parts that are not in Russian, a Russian translation must be furnished by the applicant within two months following the date of receipt, by the Eurasian Patent Office, of the Eurasian application. The Eurasian Patent Office accepts the filing of applications by facsimile, but the signed original must reach the Office within 14 days.

4. The procedure in the Eurasian Patent Office follows the usual rules: there is an examination as to form; this is followed by search, publication after the expiry of 18 months from the priority date, substantive examination (which is done on the request of the applicant; such a request must be made before the expiry of six months from the date of publication of the search report), and grant or refusal of grant of the Eurasian patent.

5. If the grant of the Eurasian patent is refused, the applicant may transform his Eurasian application into national applications having the filing date and the priority date, if any, of the Eurasian application, in those Contracting States in which he wishes to obtain a national patent under the national procedure.

6. The granted Eurasian patent is not a bundle of national patents but has, in the Contracting States, a unitary legal effect governed by the Convention and the Patent Regulations adopted by the Administrative Council.

7. Any dispute concerning the validity in a given Contracting State, or an infringement in a given Contracting State, of a Eurasian patent will be decided by the national courts or other competent authorities of that State on the basis of the Convention and the Patent Regulations. Such a decision has legal effect only in the territory of that Contracting State.

8. In the case of a dispute, any national court or other competent authority of a Contracting State in which Russian is not a State language may require that the plaintiff furnish to it a translation of the Eurasian patent in the State language.

9. There is no requirement and no possibility to designate Contracting States in the Eurasian patent application. The Eurasian patent has effect on the territory of all Contracting States from the date of its publication by the Eurasian Patent Office. However, at the time when the annual maintenance fees are due and are paid, the owner of the patent must designate by name those Contracting States in which he wishes the effect of the patent to continue. Designations must be addressed to the Eurasian Patent Office, and the patent maintenance fees must be paid at the same time. A separate fee is payable in respect of each designated Contracting State.

10. Any person who has the right to be a representative before the national Patent Office of a Contracting State and who is registered with the Eurasian Patent Office as a patent agent may act as representative before the Eurasian Patent Office. Where the applicant does not have his residence or principal place of business in the territory of a Contracting State, he is required to be represented by a so registered patent agent.

11. The fee to be paid at the filing of a Eurasian application (so called "unitary procedural fee") is US$ 800, plus US$ 50 for each claim in excess of ten, if any. This fee covers also search and publication. This fee is reduced by 25% when the application, filed via the PCT, enters the regional phase before the Eurasian Patent Office and is accompanied by an international (PCT) search report. A further amount of US$ 800 is payable when examination is requested. Finally, US$ 500 are payable when the Eurasian patent is granted.

12. The list of registered patent agents, the schedule of fees and printed application (and other) forms are available from the Eurasian Patent Office.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
